Orlova, T. L.
OSCILLOGRAPHIC METHOD OF MEASURING THE RATE OF MOTION OF A METAL IN A CASTING MOLD. Trans. from [illegible] (Stanok i instrument, [illegible] Order from [illegible] SLA [illegible] 80, p[illegible] 80 61-19129

Rough draft trans. of Lit'eynoye Proizvodstvo (Foundry Production), 1954, no. [illegible], p. 25-27

The oscillographic method was approved for measuring the [illegible] rate of motion of Al- and Zn-base alloys in casting (the pouring temperature was sufficient to warrant the flow of the metal in the mold up to the point of crystallization) and for measuring the rate of flow of the metal in the range of precrystallization temperatures for the purpose of establishing the relationship between the fluidity and the rate of flow of the molten metal. The values of the rate of flow measured under uniform conditions of the experiment [illegible] good conformity of the results was observed during repeated pourings.
